Products:

SmokeStorm HPS-1

The Smokestorm HPS-1 uses a unique high pressure delivery system combined with a pump-less design to achieve outstanding results. A mere 10 second burst will white out a large size room, shop or business.

The unit is also capable of producing smoke continuously for larger areas. The smoke-fog is non toxic and also completely harmless and will not effect sensitive computers / electronic equipment.

Features:

- * One unit does all - chainable for larger areas.
- * 5 metre long vapourisation capillary.
- * 120 PSI. pressure feed.
- * Tripple nozzle smoke output.
- * Pumpless design (Greater Reliability)
- * Platinum resistance temperature sensing.
- * Battery backup.
- * Cost competitive.

Specifications:

Colour - White.

Weight - 41Kg.

Size:

Height - 440mm

Width - 600mm

Depth - 225mm

Voltage - 230~240 AC

Wattage - 2400w (Heating)

- 70w (standby)

Fluid Capacity - 1.5 litres

Battery back-up - 12v 1.2A

Smoke Output Area Covered:

10Sec. Blast 400m3

20Sec. Blast 800m3

(To Zero Visiblility)*

* Once smoke has dissapated evenly.

Can't See A Thing !

Investment in SmokeStorm Security

Its a known fact that standard and monitored alarm systems do not stop theft, by the time someone has responded to the alert there's a good chance the thieves have already escaped with some or all of the goods.

SmokeStorm Security offers instant protection and a excellent opportunity for investors to get involved with the future of security.
